

Geppetto chair

Fang Studio Ltd.
方设计有限公司

Geppetto is a polycarbonate chair inspired by the ingenuity of China's Ming dynasty furniture. The chair perfectly fuses the elegant form of a classic Ming chair and the pragmatic sensibilities of contemporary design. The result is a lightweight, well stackable and weather resistant armchair that pays homage to traditional Chinese aesthetics.

Ming furniture is made from a single type of material without the need for any adhesives or nails. The Geppetto, being made in one piece of polycarbonate, draws an ironic parallel. The modern technology also allows the perfect curves of a Ming chair to be rendered in a split second, such that an elitist aesthetic style that used to take many days to create by hand can now be mass-produced and enjoyed by all.

The Geppetto is the first high-end original design for gas assisted moulded plastic chairs to come out of China that is suitable for both Western and Asian markets. The Geppetto maximizes the potential of traditional Chinese aesthetics while catering to the real needs of contemporary urban lifestyles.

Geppetto是一张聚碳酸酯椅子，灵感源自中国明朝的传统家具。这张椅子融合了明朝古典椅子的高贵脱俗，以及现代设计的实用灵巧。Geppetto轻巧、容易摆放，而且可抵御天气的变幻无常，实在要向中国传统美学致敬！

明朝家具只使用单一物料制成，毋须使用其他黏剂或钉子。Geppetto使用一整块的聚碳酸酯，却出乎意外地达致平衡效果。现代科技令明朝椅子的完美弧度分成两份，这种美学风格如以人手打造，可能需时数天；但如今我们可以大量制造，一同享用。

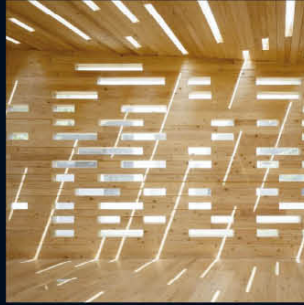

Geppetto首个高档次的原创设计，令气体辅助注塑椅子冲出中国，迈向西方和亚洲市场。Geppetto充份发挥传统中国美学的潜力，同时确切回应现代城市生活的需要。
